# Environmental Monitoring Report Noise Monitoring

---

## Hall Quarry

March 2024

Date Published: 2<sup>nd</sup> April 2024

This monitoring report is to satisfy the requirements of Section 66 (6) of the Protection of the Environment and Operations Act 1997, to make available, within 14 days of obtaining any monitoring data that relates to pollution under an Environment Protection Licence.

The monitoring of pollutants provided in this report is undertaken as per the requirements of Environment Protection Licence 4082 (EPL 4082 – Boral Hall Quarry)

This report provides environmental monitoring data for Hall Quarry for the period November 2017 to April 2024.

Hall Quarry Information	
Premise Details	Boral – Hall Quarry
Address	Kaveney's Rd, Murrumbateman NSW 2582
Licensee	Boral Resources (Country) Pty Ltd
EPL No	4082
EPL Location	<a href="https://apps.epa.nsw.gov.au/prpoeoapp/ViewPOEOLicence.aspx?DOCID=183732&amp;SYSUID=1&amp;LICID=4082">https://apps.epa.nsw.gov.au/prpoeoapp/ViewPOEOLicence.aspx?DOCID=183732&amp;SYSUID=1&amp;LICID=4082</a>
Date of dataset update	2/04/2024

Monitoring data in this report relates to the monitoring undertaken for the following environmental pollutants:

- Noise

# Noise

Noise monitoring is conducted as per condition L2 of EPL 4082. Noise monitoring is conducted on an annual basis. The noise monitoring results are summarised below.

## Qualifications related to Noise:

### L2 Noise limits

L2.1 Noise generated by premises must not exceed the limits in the following table during the defined period, where LAeq means the equivalent continuous noise level – the level of noise equivalent to the energy-average of noise levels occurring over a measurement period.

Noise from the premises is to be measured at the Manager's Cottage, "Silverwattle", Kaveney's Road to determine compliance with this condition.

Noise Limit LAeq (15 minute)	Period
39 dB(A)	7am to 6pm Monday to Friday 7am to 1pm Saturday
37 dB(A)	6pm to 10pm Monday to Friday
36 dB(A)	All other times

L2.2 The noise limits identified in Condition L2.1 apply under meteorological conditions of: (a) Wind speed up to 3m/s at 10 metres above ground level; or (b) Temperature inversion conditions of up to 3 degrees C/100m and wind speed up to 2m/s at 10 metres above the ground

## NOISE RESULTS

### April 2023 NOISE MONITORING ASSESSMENT

These results are presented as shown in the Noise Assessment report prepared by Muller Acoustic Consulting.

**Table 5 Operator-Attended Noise Survey Results – Manager’s Cottage (R1)**

Date	Time (hrs)	Descriptor (dBA re 20 µPa)			EPL Limit	Meteorology	Description and SPL, dBA
		L <sub>Amax</sub>	L <sub>Aeq</sub>	L <sub>A90</sub>

Muller Acoustic Consulting Pty Ltd (MAC) has completed a Noise Monitoring Assessment (NMA) on behalf of Boral for their Hall Quarry, Jeir, NSW. The assessment was completed to quantify site noise emissions against relevant noise criteria pertaining to quarry operations and traffic noise.

Attended monitoring during Tuesday 4 April 2023 and Wednesday 5 April 2023 identified that operational and road noise emissions generated by the quarry were audible during the day periods at the Managers Cottage (R1) and Silverwattle (R2), however, remained below relevant noise limits.

Quarry noise remained inaudible during all other measurements, and therefore satisfies specified noise limits in the Environmental Protection Licence and Development Consent. These monitoring locations were dominated by extraneous sources such as traffic that predominately masked quarry operations.

## MAY 2022 NOISE MONITORING ASSESSMENT

These results are presented as shown in the Noise Assessment report prepared by Muller Acoustic Consulting.

**Table 4 Operator-Attended Noise Survey Results – Manager’s Cottage (R1)**

Muller Acoustic Consulting Pty Ltd (MAC) has completed a Noise Monitoring Assessment (NMA) on behalf of Boral for their Hall Quarry, Jeir, NSW. The assessment was completed to quantify site noise emissions against relevant noise criteria pertaining to quarry operations and traffic noise.

Attended monitoring during Wednesday 27 April 2022 and Thursday 28 April 2022 identified that operational and road noise emissions generated by the quarry were audible during the morning shoulder and day periods at the Silverwattle (R2), however, remained below relevant noise limits.

Quarry noise remained inaudible at both Manager's Cottage (R1) and Barton Highway (R3) locations, and therefore satisfies specified noise limits in the Environmental Protection Licence and Development Consent. These monitoring locations were dominated by extraneous sources that predominately masked quarry operations.

## Historical results

### APRIL 2021 NOISE MONITORING ASSESSMENT

The monitoring and assessment results are presented in individual tables for each monitoring location.

The results of the attended noise measurements at location R1 for the April 2021 survey period are summarised in **Table 4** with relevant EPL limits, the calculated quarry noise contribution and prevailing meteorology conditions at the time of each measurement.

Table 4 Operator-Attended Noise Survey Results – Manager’s Cottage (R1)							
Date	Time (hrs)	Descriptor (dBA re 20 µPa)			EPL Limit	Meteorology	Description and SPL, dBA
		L <sub>Amax</sub>	L <sub>Aeq</sub>	L <sub>A90</sub>
